

ZACHARY COMMUNITY SCHOOL DISTRICT

ASSESSMENT PLAN

The Zachary Community School District believes that our students can achieve high expectations. The assessment administered in the Zachary Community School District provides integral data that affects decisions about placement, advancement, instructional needs, and curriculum.

Louisiana students are assessed annually in grades 3 through 8 and high school. Students in grades 3 through 8 take assessments in English Language Arts/literacy, mathematics, science, and social studies. In high school, students take standard assessments referred to as LEAP 2025 HS assessments in six subjects: Algebra I, Geometry, English I, English II, Biology, and U.S. History. The assessments measure proficiency in each subject area and assist in determining whether students have mastered the knowledge and skills for college and a career readiness.
